A Very Fancy Paper

Your Name

Your Organization

youremail@internet.com

Month Date, Year

Abstract

A good abstract convinces someone to read your paper. This abstract does no such thing.

Contents

1 Web Security

1.1 How To Be Secure

Don't let people hack your stuff. [1] You need at least one `\cite` command in your document somewhere, or BibTeX will throw up its hands in defeat.

2 Forgetting Things

You may wish to occasionally remind yourself that something in your document needs fixing or finishing.

2.1 Being Specific

The scouter said that his power level was WHAT?.

2.2 The Longbottom Approach

In which you can't remember what you've forgotten:
FIX ME!
